Persian Relief Commission Finds Better Conditions in Freed Sections.

MUCH WORK FOR FUTURE

BY ANTHONY CZARNECKI. ablegram to The Evening Star and

Maurice Weitheim of New York, mem-

there. They also organized relief associations in Mesopotamia, Persia and Armenia. They visited India and the Armenia. They visited India and the Transcaucasus. After making a full and detailed report to the American and detailed report to the American peace commissioners and other officials the party will proceed home. Dr. Judson was given a reception by professors, students and alumni of the University of Chicago in Paris and will be guest of into the fighting again in October.

That he needed no telescope. His ammunition helper was wounded and he had to load as well as fire. When the other was no the president, "the On their side the Jugo-Slavs condend that this territory rightfully is a part of their new republic because of the preponderance of Slavic peoples among the population, and that without this outlet on the coast their new will, but there was no attempt then to will be used to see the same of London made just before it entered the war.

On their side the Jugo-Slavs conforms the use of the war.

On their side the Jugo-Slavs constant this territory rightfully is a part of their new republic because of the openies of the preponderance of Slavic peoples among the population, and that will, but there was no attempt the out this outlet on the coast their new republic because of the openies of the preponderance of slavic peoples among the population, and that will, but there was no attempt the there. They also organized relief assoof Chicago in Paris and will be guest of honor at a dinner given him by the alumni association.

into the fighting again in October. A wound in the left wrist cut the member where he had just removed

To Visit College Men's Graves. "After making the report," said Dr. Judson to me in an interview, "and before starting for America, my purpose is to visit the grave of every student and graduate alumnus of our university who fell in this war. Though I cannot give some of the facts and details of our inquiry, I may say that the work was interesting, important and successful. We traveled through Persia, Armenia. Mesopotamia, the Transcaumenia, Mesopotamia, the Transcau-casus and India, by convenient means sometimes, and at others by less agree-able means. We used automobiles, boats and various rigs of native make. "The British work found by us in va-rious places was most interesting and rious places was most interesting and worthy of the notice of the world. For worthy of the notice of the world. For example, Mesopotamia was misgoverned and suffered from tyranny and inefficiency under the Turks. The British substituted for this order justice and law, and they also began a very effective development of the natural resources in that ancient land. Irrigation works are being extended on a large scale and the desert is being reclaimed. Nomad Arabs are rapidly settling on the soil and becoming lawabiding, prosperous people. Above all, the British are paving the way for local self-government by the Arabs."

Learn to Govern Themselves.

"These Arabs are learning what it is to be free and govern themselves. The British are substituting for the semi-barbarous conditions of the past semi-barbarous conditions of the past not merely prosperity in every direction, but also habits of order which in the end will make that a free, self-governed country. The people there are learning that in the end it pays better to be orderly and law-abidling than to try to make their living at the expense of their neighbors.

"Persia we found to be in a pitiable plight owing to the devastation that had occurred there. There were starvation and destruction on all sides. The commission organized relief work there and left it in operation. Armenia has suffered frightfully. In addition to other horrors the country has been stripped of the people who were not massacred by the Turks. The Transcaucasus is well protected at the present time by British forces and the people are getting along without bolshevist unrest."

Warn Against Bolshevism.

Dr. Judson and the other members of the commission warn against the menace of bolshevism. They declare that America and the allies should not permit the discordant elements to destroy one another and the order and circlivation of the world. Dr. Judson destroy one another and the order and civilization of the world. Dr. Judson declares himself to be in favor of strong Polish, Czecho-Slovak and Jugo-Slav countries as indispensable barriers against bolshevism on the one side and German aggression on the other. The work of bringing order out of chaos by the conference is as important as was the winning of the war if the fruits of victory are to be assured. The work not only of reconstruction, but of absolutely new construction, of countries, peoples and nations with great responsibilities nations with great responsibilities before the world must be carried out with the best thought on the basis of justice, right, order, law and freedom if the real victory of the war is to be permanent and worth while.

FRANCE AND U.S. SEEN **AS SEEKING SAME GOAL**

London Times Argues That There Is No Fundamental Difference Between Two Leaders.

LONDON, January 2 .- Comparing the speech of Premier Clemenceau before the French chamber of deputies and President Wilson's address at Manchester, the Times argues there is no fundamental discrepancy between the aims of the two men. The newspaper says:

"All that M. Clemenceau says of the difference-contrast we may call itbetween the positions of France and America is simple truth. France sees and feels what a German invasion means, and demands absolute security against a recurrence of the danger she so narrowly escaped and the sufferings she yet endures.

"Mr. Wilson is equally determined to deliver her from those evils. Where M. Clemenceau appears most markedly to differ from Mr. Wilson is in his confession of a certain skepticism as to the adequacy of any means except one to secure the just claims of

one to secure the just claims of France.

"There is no incompatibility between Mr. Wilson's ideal and the more prosaic immediate object which M. Clemenceau sets before France. One is a necessary stage to the attainment of the other. A supremely important fact is both admittedly desire the same immediate steps, and both—albeit one with confidence and the other with hesitation—look forward to the same ultimate goal. It is a promising feature of the attitudes of the two statesmen that neither affects to entertain extravagant hopes."

The newspaper regards President Wilson's suggestion as to the machinery for subsequent readjustments the most valuable and important of his recent utterances, and contends that only by some such methods as those advocated by Mr. Wilson and by continuous conferences can "the burdens of the partnership between America and Europe be discharged and borne."

Honors for British Generals.

LONDON, January 1.—Earldoms will e conferred on Field Marshal Haig nd Vice Admiral Beatty in recognition of their services during the war, according to the Mail. It is stated that Gens. Horne, Plumber, Byng, Rawlinson, Birdwood and Al-lanby will be elevated to the peerage.

ONE TANK DID WORK CUT OUT FOR THREE

Corp. Andrew B. Yeager of Chester, Pa., Tells of Hot Service Seen at Cambrai.

CAMP MEADE, Md., January 2 .-Tankers who are the lucky few to survive action probably have seen more of war than any other fighters. Corp. Andrew B. Yeager of Chester, Pa., here with a slight flesh wound in his left hand, said his tank, named Asbestos, did the work cut out for three tanks after the two others had been blown up.

been blown up.

In his high perch, where he pointed and fired a six-pound gun, he had a chance to see the infantrymen of the 27th (New York) and the 30th Divisions in a man-to-man rifle duel with some of the stubbornest fight was received here today from official the fire since it was lighted in the tub last night after a crowd of citizens and men in uniform had extinguished one started in a decorative urn in was received here today from official tafayette Square.

Half a dozen women arrested during the fire since it was lighted in the tub. Post of Chicago, Prof. Abraham Valen-tine Jackson of Columbia University and

Maurice Weitheim of New York, members of the commission, has reached Paris, having finished his work.

For months the commission visited parts of Persia and conducted special studies into the conditions prevailing there. They also organized relief assometric and a German barrage, but a direct hit was never scored against it and casualties were from bullets that came in the portholes.

One of the first bullets smashed his telescope sight. His cheek was cut, but his eye did not suffer. After that the fighting was at such close range that he needed no telescope. His ampuition believe was wounded and he

dispute as one of the most important growing out of the dismemberment of the old Austro-Hungarian empire, and they expressed hope that an agreement satisfactory to all concerned would result from the conferences between Presidents Wilson and Masaryk and Italian statesmen.

Italy always has regarded possession of the east coast of the Adriatic by Austria-Hungary as a menace, and it lays claim to the territory by virtue of the provisions of the treaty of London made just before it entered the war.

Court this morning.

Yesterday afternoon the women burned copies of speeches delivered by President Wilson in Europe, and as the last one was destroyed the "sentinels" unfurled a banner bearing an inscription denouncing President Wilson as "a false prophet of democracy." A dozen soldiers and sailors instantly surrounded the banner and shut it from the gaze of the crowd of several hundred persons.

An Army captain then stepped in front of the spectators, and called for three cheers for the Jresident, "the
